

Profile of a Friend of Green Suriname

“Collective impact requires that funders support a long-term process of social change without identifying any particular solution in advance. They must be willing to let grantees steer the work and have the patience to stay with an initiative for years, recognizing that social change can come from the gradual improvement of an entire system over time, not just from a single breakthrough by an individual organization”

A Friend of Green Suriname:

1. Shares the same vision of Conservation International Suriname, which is to keep Suriname the greenest country on earth
